

2-D and UID CODE

MARKING AND VERIFICATION

Manufacturers are increasingly turning to the use of 2-D code direct part marking (DPM) and reading technologies. DPM reduces costs, improves quality, and satisfies a number of industry-specific and government mandates, including U.S. Department of Defense UID (Universal Identification) requirements. Successful implementation requires the integration of robust, industrial marking systems with 2-D code verifiers located at the marking station. Together, they insure the ability to easily read and track the 2-D code.

Telesis' extensive experience in the automotive, aerospace and firearms industries makes us uniquely qualified to provide, completely integrated, "mark-read" solutions. We offer the following products and services to satisfy a wide range of 2-D code applications:

 Telesis' PINSTAMP® Dot Peen Marking Systems

 Telesis' PROSCRIPT® Laser Marking Systems

 Expert integration of these Telesis products, as well as the integration of 2-D code verifiers marketed by a number of suppliers

PINSTAMP® Markers provide
an effective but extremely
economical solution to
many 2-D code DPM
applications on materials
as diverse as plastics and
hardened steel. Telesis'
patented PINSTAMP®
Marking Technology
provides highly accurate dot
placement at specific X/Y locations. This process
makes PINSTAMP® Markers far superior to
conventional "oscillating stylus" dot peen markers,
especially in 2-D code applications, where
accurately marked codes are the key to readability.

TELESIS Lasers are truly "state-of-the-art", producing almost perfectly formed 2-D codes nearly instantly on a wide range of materials, including virtually all plastics and metals. These qualities make PROSCRIPT® Lasers the perfect choice for applications requiring extremely high throughput or very small 2-D codes.

COMPLIANCE

All TELESIS LASERS and all PINSTAMP® Markers except for the TMM5100/420 and TMM7200 comply with all major 2-D code DPM standards, including:

- SAE AS9132

 (as adopted by the International Aerospace Quality Group)
- · AIAG B-4
- AIAG B-17

- NASA-STD-6002
- NASA-STD-HDBK-6003
- Department of Defense Guide to Uniquely Identifying Items (UID)
- MIL-STD-130L
